TRICT .- The army correspondents of the Cincinnati papers have written most interesting and graphic descriptions of the battles fought by our soldiers in eastern Kentucky, but they are afflicted with a chronic disposition to detract from the loyalty of the Union men in that region. One of these excellent writers, said to be the Rev. Mr. Gaddis, chaplain of the 2d Ohio, in his recent correspondence for the Commercial, while complimenting Gen. Nelson in most deserved terms, complains that the Union men of Eastern Kentucky did not sympathize with him sufficiently and asserts that there are many professional Union men there, but when it comes to taking a positive stand, it is "Good Lord or good devil" that, but if the secesh triumph they are on that side. "True," he says, "we found many good friends, but they were only the exceptions." We cannot better do our duty towards exonerating our friends in that quarter of the State than by quoting their noble and truthful defence, as made by the Maysville Engle. That paper says:

"The charges against the Union men of Eastern Kentucky are most unjust and entirely untrue. Kentucky already has her full quota in the camp and in the field, although recruiting only commenced in the State about ten weeks ago, and this under the many disadvantages arising from the fact that nearly one third of the State is within the Confederate lines and recruiting in such counties thus rendered exceedingly difficult. The Ninth Congressional District Lot only gave the largest Union vote of any in the State, but it has nobly responded to the call to with food and clothing; but, though suffering intensely, our brave boys have borne up under hardships without a murmur, and their enthusiasm and zeal have centinued unchilled by the neglect of the Government. They have endured their full share of the fatigues of the campaign uncomplainingly, and when exposed to the fire of the enemy, as they have been most liberally, all undrilled and badly equipped as they were, they proved to the satisfaction of all that Kentucky blood has not degenerated."

"Nor is it true that the Union men of Kentucky, outside of the volunteers, have as a general thing exhibited any want of sympathy with the causo. On the contrary, we know that theirs' has been a most generous ardor, and that General

has been a most generous ardor, and that General
Nelson has been assisted by them to the extent

man contemplation was confined to the world's su
face and its int rior, and men extended their spe
ulations beyond the atmosphere they breathe Nelson has been assisted by them to the extent of their ability. We know not how much was expected of them, but it is a fact that all classes of Union mer, especially the business men of Maysville, have done their utmost to aid General Nelson in the organization of his brigade and in the vigorous prosecution of the campaign. The assertion that the masses of the Union men of the Ninth District are ready to turn secassionists if the Confederates shall obtain the upper hand, is inexcusable in one who has witnessed their sufferings in the mountains for the Union's sake; who ings in the mountains for the Union's sake; who has seen whole neighborhoods depopulated by families fleeing from secession tyranny, and who has known men to leave their children and wives at the mercy of the marauders to volunteer in the ranks of the nation or to live in the woods and caves, when safety might have been assured by a caves, when safety might have been assured by a the past year.

We are informed on good authority that private despatches, received in this city last night, from Handsboro', state that the steamer Oregon put in there last evening and reported the capture of the steamers California, of the mail line, the Lewis, the John Briggs, and one other vessel.

We hope the report is not well founded, but fear it is, as the Gulf was known to be filled with Lincoln gunboats. The steamers, except the Lewis, left here yesterdly morning.

The August Ring of Reteors, by Fron. R. A. Revented to the steamers of the solar system that there is at least one ring of meteoric formations, surrounding the sun, which has a regular revolution. The recurrence of the meteoric display in August of each year is explained by the fact that the earth passes, at that time, through the ring, and the contact of its formations with our atmosphere renders them visible in combustion. The article of Professor Newton is specially valuable and interesting, as presenting the fact that the inclina-

Winchester,"
Further on he says: On the 18th (Thursday) at half past one in the morning, he telegraphed Gen. Scott the condition of the enemy's force and of his own, and closed the despatch by asking, "Shall I attack?" He does not say what despatch he sent on Friday, the 19th. Generals Scott and McDwall were watching lebrace with this day his communication was similar to that of Thursday? He says, on the 20th he heard that Johnson had marched with 35,000 Confeder

that surrounds the sun, and is as regular in its revolution as the earth or any planet. Prof. Newtoo, taking one morning's observation, makes a rough calculation that there are more than 300,000,000,000,000 of these bodies in the ring.

The mind at once recurs to the ring of Saturn, and wonders whether this meteoric ring in any manner resembles that. The telescopic power of new instruments has already resolved that must be autiful phanomerom of the heaven; into a secthat Johnson had marched with 35,000 Confederate troops and a large artillery force in a southeasterly direction. He immediately telegraphed the information to Gen. Scott and knew that he received it the same day.

It thus appears, from General P.'s own words, that this information on Saturday was the first Generals Scott and McDowell could have had on the approach of Johnson's force. And did they are received in the same day to the same day the same day to not naturally conclude that, as he could not reach Manassas in one day, he might possibly reach it on Monday? If so, we see the apparent "military

on Monday? If so, we so the apparent "military necessity" for the Sunday battle.

Now it is well understood that Johnson did actually leave Winchester with his force on Thursday, and had been making preparations two or three days before by hauling cars over the turnpike to the Manassas Gap Ruilroad. And it is also well known that Gon. McDowell's army did accomplish on Sunday all that he and his Generals ever expected it to accomplish. But when it had beaten one army, another was brought up, for which no provision had been made. Had Gen. Patterson's information of Saturduy been given Patterson's information of Saturday been give on Thursday, when it cught to have been, o even on Friday, then it is probable the battl would not have been fought on Sunday. McCLELLAN AND THE ARMY. - It is ver McClellan And the Army. — It is very pleasant to see the confidence the whole army has in McClellan. At this moment he reigns, or, if he chose, absolutely distates, and I fancy, if the truth was known, the President and Cabinst are very secondary. He holds in his hand six hun dred thousand men! What vast responsibility! Yet he is, all say, fully equal to it; and, better yet, there is no danger of his abusing this power. His will is absolute here; he has brought this huge mass of men into order; he directs what they shall do from the most minute points of etiquette or dress up to the great movements that are to give us certain success. That there will te an advance, and shortly, I am absolutely certain.—Wash. Cor. New York Post.

CAPITOL .- It is know at the artist, Rogers, was commissioned some years ago by our Gov rament to model and have cast in bronze folding doors for the Capitol. The doors have just been cast at Munich, and an English writer who has seen them gives the following description of the designs which ornament them:

The bronze doors intended for the Capitol at Washington, designed and modeled at Rome, by the American artist, Rogers, have lately been on view at the Royal Foundry, where they were cast. The workmanship, as is always the case with whatever emanates from the Munich foundry, is admirable. There is a sharpness in the lines, and a finish in the minutest detail, which are in the highest degree creditable. Of the doors themselves it is not easy to convey an alequate idea by a mere discription; for an enumeration of all that is represented might induce the belief that there was a crowding of objects, and that the allotted space was overfilled; and this is not the case. Each door—the whole forms a folding door—is divided into four compartments or panels. Thus, within a semi-circular space above, which has the breadth of both the doors together, there are nine divisions, in each of which an important moment of Columbus's life is represented. The figures stand out in full relief, and some of the designs which ornament them:

Here Columbus, in chairs, surrounded by a sorrowing population, is about to embark for Europe. Then, the "last scene of all," accomplishing his "strange, eventfal history," we see him on his leathbed, attended only by a nun and some priests, who administer to him the consolations of

portant moment of Columbus's life is represented.
The figures stand out in full relief, and some of the groups are eminently successful. The crowning event of the discoverer's cureer occupies the commanding spot over the top of the doors. Here Columbus, standing on a mound, forms the central figure. He has just landed from a boat, and with the standard of Arragon and Castile planted on the new soil, and with sword upraised in his right hand, he takes possession of the land in the name of his sovereigns. Some boatmen are still in the skiff, others are kneeling on the shore, while a group of Indians, peeping from behind a tree on the epposite sids, look on in wondering astonishment. In one compartment is represented the triumphal entry of Columbus into Madrid on his first return from America, amid crowds of gazers at him, the hero of the triumph, and at the Indians, who precede the procession with parequets on their upraised arms.

The next panel is cocupied with a sadder story. Here Columbus, in chains, surrounded by a sorrowing ropulation, is about to embark for Europe. Whether other rings texist, or not, remains to be shown, but this for the present may be regarded as accertained, that a meteoric ring, with an inclination of from 84 to 96 to the scliptic, and with a periodic time of 281 days, actually forms an important part of the solar system. That the world passes through this ring annually in August, and is several days in passing from side to side, so that its thickness is five or ten millions of miles.

The general reader will perhaps understand this discovery better by placing it in very simple language. Most persons are already familiar with the fact that meteors, or shooting stars as they are often called, are annually visible in great quantities during the month of August on certain nights. On any one of those nights two or three persons, watching the sky, may count from one to two hundred of them in an hour or two. It may now be taken as an ascertained fact in astronomy that these meteors, which consist of

manner resembles that. The telescopic power of new instruments has already resolved that mest beautiful phenomenon of the beaveurs, into a series of rings, instead of one ring only. Its substance is unknown. It may be conjectured that the loose and scattered masses which lie in the Solar ring, and which are perhaps too far apart to present a nebulous appearance to an observer on a distant planet or star, may have their counterpart in the compact and brilliant discs which surround the planet Saturn. But speculations of this kind are very crude in the present state of our knowledge on the subject, and we recur to our first remarks that new and startling discoveries like this only serve to show us how little we are ually know of the secrets of immensity.

It is just half a contury since the Nabular Hypothesis of Sir William Herschel startled the thinking world, and for a long time scientific men believed the theory of growing suns and planets, formed from misty impalpable matter accumulating around contres of revolution. The Rosse telescope resolving nearly all the known nebulæ into groups of stars exploded that theory, and the Westminster Review is the last of its defenders. But from attempting to enter the secret places of G d's creative power, which, as we have already remarked, are closed to human ingress, it now soems as if the human intellect may possibly be permitted to learn something of the history of the decay of suns and stars. A little while ago we learned that in a wide space in our own system, where a planet might have found its

ry of the decay of suns and stars. A little while ago we learned that in a wide space in our own system, where a planet might have found its place, there were vast asteroids, whose number we are yearly increasing, which follow as it were in the orbit of the lost-planet, like fragments of a cyploded sphere.

And now we have the company to the lost planet, like fragments of the cyploded sphere.

And now we have the company to the lost planet, like fragments of the cyploded sphere. we are yearly increasing, which follow as it were in the orbit of the lost-planet, like fragments of an exploded sphere.

And now, we have this ring of meteoric bodies, lying in an orbit around the solar centre, the orbit itself by some convulsion hurled out of its place, so that our own planet now passes through it, as of im some former period, a planet had rushed furning along its course of destruction and vanished, leaving its track marked forever after with the strewn fragments of its material.

WEDNESDAY, DECEMBER 4, 1861.

We surrender the larger portion of our available space this morning to the President's Message. As we at this writing have seen only a fragment of the message we of course have formed no opinion concerning the paper. It will be read by everybody with the deepest

In the first column of the first Part of the paper of Dr. Breckinridge, as published in our columns, it is stated, as part of the illustration founded on the "Mountain Empire" that peace cannot be made except on the basis of a single National Government,-that the "Mountain Empire" embraces 30,000 square miles. It should read 300,000 square miles The mistake-we cannot tell how committedmakes that particular argument appear to be only one tenth part as strong as it really is.

There are some other provoking and unaccountable typographical errors in the first Part of this great paper, which, like the one noticed above, unfortunately escaped detection until after the whole paper was published in our Weekly. They are, however, such as a critical reader will readily take for what they are, and such as an uncritical reader wil hardly discover.

THE KENTUCKY SENATORS -James Guthrie THE KENTUCKY SENATORS—James Guthrio, whom some Kentuckians name for U. S. Senator, is the live embodiment of the secession idea in the form of state neutrality. That is not all. He was the great feeder of the rebels by his railroad, long after the proclamation of the President prohibiting commercial intercourse with them. He was, in the meanwhile, personally malignant toward the North, as he always has been excepting when he wanted to sell his railway bonds in our market, and denounced as "fools" (with certain edicatives prefixed which we do not care to residentives prefixed which we do not care to remarket, and denounced as "fools" (with certain adjectives prefixed which we do not care to repeat) all Northern statesmen and Editors who denied the consistency of state neutrality with Federal sovereignty. He was prominently, and at one time with hopes of success, before the Charleston convention as a candidate for the Presidency, and it was never objected to him that he fall does in Southern ideas or in subsequent he fell short in Southern ideas, or in subserviency to the great Southern party which subsequently chose the traitor Breckinridge for its representa-tive man. The North would have a right to fee insulted if the State of Kentucky should sensuch a man to the Federal Senate, so long as should has a thousand citizens equally able, more hones

courtesy in the expression of these views, as they must be cordially accepted by all loyal men in Kentucky. Rebels only, either open or covert, can take offence at them—and this is true

We think we have never before read anything in a newspaper which amazed us as this most indecent and unjustifiable assault on Mr. Guthrie amazes us. The World is a respectable journal, but this is not respectable journal, but this is not respectable journal, but this is not respectable journalism. It is the contrary. Sinch however, it is apparent that here, as in every oth Sta'e, foreign dangers necessarily attend domest difficulties, I recommend that ample and adequa measures be adopted for maintaining the publidefences on every side. While under this gener recommendation, provision for defending or coast line readily occurs to the mind, I also the same connection, ask the attention of Congress to our great lakes and rivers. It is believe that some fortifications and depots of arms at munitions, with harbor and navigation improvements at well selected points upon these wou ary measure, that Congress provide for the con-struction of such a road as speedily as possible. Kentucky will, no doubt, cooperate, and, through with some existing railroad, and whether the route with some existing railroad, and whether the route shall be from Lexington or Nicholasville to Cum-berland Gap or from Lebanon to the Tennessee line in the direction of Knoxyille, or some still different line, can easily be determined. Kenof the people of any State. To sum up the whole in a single sentence, we must not allow the return to Congress of disunion men, under any modified character of sectionalism or neutrality.—New York World.

ment than they probably expected. If it rejust to suppose, as the insurgents have med to assume, that foreign nations in this a, disregarding all moral, social, and treaty igations, would act solely and selfishly for the stapedy restoration of commerce, including cially the acquisition of cotton, those nations are more directly or clearly through the deaction than through the preservation of the ions are actuated by no higher principle that all the states shall be accommodated in which circuit courts, attended by Supreme Judges, while, in fact, Wisconsin, Minnesota, Iowa, Kansact more directly or clearly through the deaction than through the preservation of the ions are actuated by no higher principle that all the States shall be accommodated in with circuit courts. Nor can this be well remedied without a change of the system, because the adding of justices to the Supreme Court as a proposed in the country with circuit courts would create a court altogether too dangerous for a judicial body of public than by giving encouragement to the noipal lever relied upon, the exciting of for-

In the midst of unprecedented political troubles,
we have cause of great gratitudes to God for healths
and uncert administratives.

The results of the Senote and the gratifying, when it is considered that the leaven of treason was found existing in some of these new countries when the Federal officers arrived there. The abundant national resources of these Territories, with the security and protection afforded by organized government, will doubtless invite to them a large immigration, when peace shall restore the business of the country to its accustomed channels.

I submit the resolutions of the Legislature of Colorado, which evince the patriotic spirit of the people of the Territory. So far the authority of the United States has been upheld in all the Territories, as it is hoped it will be in the future. I commend their interests and defence to the enlightened and generous care of Congress.

I recommend to the favorable consideration of Congress the interests of the District of Columbia. The insurrection has been the cause of the Northern States a large majority are neither hirers nor hired Men, with their families—wives, sons, and daughters—work for themselves on their farms, in their houses, and in their shops, taking the whole product to themselves, and as they have no representation in Congress. sons, and daughters—work for themselves on their farms, in their houses, and in their shops, taking the whole product to themselves, and asking no favors of capital on the one hand nor of hired laborers or slaves on the other. It is not forgetten that a considerable number of persons mingle their own labors with capital—that is, their later with their own hands, and also pay or hire others to labor for them; but this is only a mixed and not a distinct class. No principle stated is disturbed by the existence of this mixed class. Agair, as has already been said, there is not of necessity any such things as the free birded. industrial interests of the United States at the exhibition of the industry of all nations to be holden in London in the year 1862. I regret to have been unable to give personal attention to this subject, a subject at once so interesting in itself and so extensively and intimately connected with the material prosperity of the world. Through the Secretaries of State and of the Interior a plan or system has been devised and partly matured which will be laid before you.

Under and by virtue of the act of Congress entitled an act, to conficate property used for insurrectionary purposes, approved Aug. 6, 1861, the logal claims of certain persons to the labor and service of certain other persons have become class. Again, as has already been said, there is not of necessity any such thing as the free hired laborer being fixed in that condition for life. Many independent men everywhere in these States, a few years back in their lives, were hired laborers. The most prudent, pennices, in the world labors for wages awhile and saves a surplus with which to buy tools or land for himself. He thus labors on his own account and at length hires another new beginner to help him. This is the just and generous and prosperous system which coems the way to all, gives home to all.

tem which opens the way to all, gives hope to all, and consequent energy, progress, and improvement of their condition to all. No men living are more worthy to be trusted than those who and service of certain other prisons have become forfeited, and numbers of the latter thus liberated are already dependant on the United States and must be provided for in some way. Besides this, it is not impossible that some of the other States rendering a political power which they already possess and which, if surrendered, will surely be used to close the door of advancement against euch as they and to fix new disabilities and bur-dens upon them till all of liberty shall be lost. From the first taking of our national census to he last are seventy years, and we find our popu-ation at the end of the period eight times as great as it was at the beginning. The increase of those other things which men deem desirable as been even greater. We thus have at one two what the popular principle applied to Gov-nment through the machinery of the States and the Union has produced in a given time, and also what, if firmly maintained, it promises for the future. There are already among us those who, if the Union be preserved, will live to see it contain 250,000,000. The strength of to day is not altogether for to-day. It is for a vast future. Also with firm reliance on Providence, all the more firm and earnest left we preced in the great task

too, whether the free colored population already in the United States could not, so far as individuals may desire, be included in such colonization. To carry out the plan of colonization, may involve the acquiring of territory, and also the appropriation of money, beyond that to be expended in the territorial acquisition. Having practiced the acquisition of territory for nearly fifty years, the question of constitutional power to do so, is no longer an epon one with us. The power was first questioned by Mr. Jefferson, who, however, in the purchase of Louisiana, yielded his scruples on the plea of great expediency. If it be said that the only legitimate object of acquiring territory is to farnish homes for white men, this measure effects that object, for the emigration of colored men leaves additional room for white men remaining or coming here. Mr. Jefferson, howfirm and earnest, let us proceed in the great task which events have devolved upon us. ABRAHAM LINCOLN.

Connoisseurs Medical Gentleman at Madras "Only Good Sauce," at Worcester. and applicable to EVERY VARIETY

The above SAUCE is not only the BEST and most por-ULAB CONDIMENT known, but the most *Economical*, as a few drops in *Soup*, *Gravy*, or with *Fish*, hot and cold

which unprincipled Sauce manufacturers have in vain endeavored to imitate.

On the Breakfast, Luncheon, Dinner, or Supper Table, a cruet containing "LEA & PERRINS' WORCES TERSHIRE SAUCE" is indispensable.

To appreciate the excellent qualities of this delicious preparation it is only necessary to purchase a small bottle of the genuine, of a respectable grocer or dealer, as many Hotel and Restaurant proprietors seldom place the Pure Sauce before their guests, but substitue a genuine both filled with a spurious mixture.

For sale by Grocers and Fruiterers everywhere, JOHN DUNCAN & SONS, Union Square, Fourteenth st., New York, Charles Sauce bears on which his book to be beared as the proposal for the substitute and statement of their case, free from damage or observation, to any part of the country with full directions for use.

Hoskins annonces his determination to fight ere he makes a retrograde movement. The rebels show themselves every day on the

opposite side of the river from Camp Hoskins. They are committing all kinds of depredations in Wayne and Clinton counties, which they have in indisputed possession. They have wantonly butchered many sick Union men in their beds and stolen and destroyed much property belong ing to loyal citizens. Many of the Unionists in that region are deserting their homes and making their way to the Bluegrass Region for safety. Owing to the prevailing rains Camp Hoskins and the roads in the surrounding country are in a fearful condition.

MRS. MATT PEEL'S MINSTRELLS .-- We would impress upon the memory of our readers that tonight the Campbells give an entertainment for the benefit of the Soldiers' Aid Society. Several of our military friends have interested themselves in the matter and we feel confident that the Hall will be filled to its utmost capacity. Aside from the merits of the company, the opportunity a forded to aid a meritorious cause should induce our readers to respond liberally to the call. The programme offered is most appropriate to the oceasion, and we can promise all who attend an evening pleasantly passed and a consciousness of having contributed to the comfort of those who are defending our country and protecting our homes. Bear in mind the entertainment t

COL. LINDSEY'S REGIMENT.-It was expected that Colenel Dan, Lindsey's regiment of Kentucky volunteers, including the Marion Rifles and Washington Rifles, of this city, would arrive last evening from Frankfort by railroad. Their departure was delayed, however, and they will arrive about two o'clock this afternoon, a special train having left this city at four o'clock last evening to bring them down. They have been ordered to the mountain region of eastern Kentucky, and will depart this afternoon by the steamer Telegraph.

will commence a short season at Mozart Hall in this city to-morrow evening. The thousands who will remember the delichtful entertainments. who will remember the delightful entertainments which they gave in this city a few months ago will be more than pleased to read the announcement. The troupe, deemed perfect when we saw them last, has received many important additions and is now unequalled in its peculiar line of attraction.

ELECTION OF OFFICERS.—There was an election of officers yesterday for Col. Bayles's Cav—

The thousands and who still think and talk and will, when they have opportunity, vote as they always have, but who for the present are in arms for the Union and the laws, would demand to be discharged from a service they would abhor. "Beauty and booty" is not the watchword of the American soldier. It never was, and God forbid it ever should be, though a hundred New York Colonels with glib tongues seek to disguise its horrors in such sounding phrases that even a Cabinet officer who listens may fail to appreciate the atracity of their character.

It is useless to repeat the arguments against

tion of officers yesterday for Col. Bayles's Cavalry Regiment, encamped at the Fair Grounds, near this city. Jesse Bayles was elected Colonel, Jacob Ruckstuhl, Lieutenant-Colonel, and Messrs. John Kurfus and Levi Chilson, Majors. Mr. John F. Gunkel has received the appointment of Quar-

termaster to the regiment. The regiment, it will be seen, is ably officered.

Arrival of Regulars.—The steamer Telegraph arrived from Cincinnati last evening with a barge in tow. She brought the Sixteenth regular infantry, Maj. Sidney Coolidge, five hundred strong, and the Eighteenth regular infantry, Col. Carrington, twelve hundred strong. This force left Columbus, Ohio, on Monday.

thus notices the excessively culpable and excessively silly harangue of Colonel John

Cochrane: The people of New York know this gentleman tolerably well. Hereafter they will drop him from their memories. He has grievously craed if he imagined that his late constituents in New York had become abolitionists, or in any manne changed their views of the slavery question, an changed their views of the slavery question, and in his desperate plunge into the embrace of the Garrison and Phillips party, he has bidden farewell to New York Democracy forever. Nor has he won favorable regard from the Adminitration. When a politician, having become a soldier, takes to speech-making instead of fighting, it is safe to suppose that he is looking for effect, and is dealing in his old trade. In the present instead have the exceptions assumed to the present instead of the present instea ent instance we have the gratifying assurance that the President, Gen. McClellan, the heads of departments, and the entire Union sentiment in Washington, with a few exceptions, are profoundly grieved at the folly which he has perpetrated. There is no point more sternly insisted on by the President and by the Commander-in-Chief than the inviolability of private property. Gen. McClellan has issued the most severe orders for its protection, and condign punishment is visited.

its protection, and condign punishment is visited on every offender against those orders. Mr. Cochrane should understand better the orwho, during the Revolutionary war, knit socks and made bandages for the soldiers, is now daily and nightly engaged in the same good work for the soldiers of the Union. Although in her ninety-first year, she is, mentally and physically, as sprightly as many of helf her age. May she long live to enjoy the blessings of the Union she is laboring to sustain.

The Holman Troupe.—This charming troupe will commence a short season at Mozart Hall in the superior officers, and the spirit which aminates his so'diers. If the sentiments he utters were adopted by the Government, to burn, plunder, and destroy, to arm slaves for insurrection, and fight for the "liberty of the human race" instead of for the Constitution which was made for white Americans, if such a course were approved by the Administration, the war might as well be abandoned at once as hopeless. Every General, who has either military character or the heart of a man, would retire from the field. Hundreds

It is useless to repeat the arguments against this madness of arming the slaves. If you want, for the Union, only the Southern territory, the fields and forests, overrun by hordes of negroes made savage by rapine and blood; if you derire only the blackened ruins of its homes, the un-buried remains of its sons, the desolated hearths

Some men are born fools, and of them there i hope. Some are born with reasonable souls, and become foolish, and of such there is no hope, not the most distant.

We have confidence in the present administration of affairs, and with that confidence we have

assured our readers that the war is to be conducted on the principles which have been announced. The course of Gen. Dix in Eastern Virginia, of Gen. The following are those who did not appear in
the Senate Chamber: Breckinridge, Howe, Johnson of Tenn., Johnson of Mo., Kennedy, Pearce,
Polk, Sherman, Willey, Wilmot. Messrs. Baker
and Brigham died during the recess. Port Royal Advices — Tatnall's attack on the 6th was not worthy the name of a battle. He come with three or four vessels near enough for a few shots, which did no damage, and immedi-ately retired. Tybee Island is now occupied by our troops. The national colors are flying from the lighthouse. It is understood that Beaufort will be ccupied on the 29th by 5,000 Federal troops to prevent the secessionists from taking possession. The expedition south is supposed to be destined to Fernandina. Five thousand troops

are to go.

The Madrid Correspondencia de Espanola, reently received here, contains the following para-raph, which shows the friendliness of feeling tween the Spanish Government and the Church party of Mexico.
Yesterday took place the long announced visit to her Majasty the Queen, of General Miramon, Ex-President of Mexico. Our august cousin received him with her usual amiability, as did also the beauty of the local party of the l

ceived him with her usual amiability, as did also the King, her husband, who was seated at her side. The conversation lasted for more than a quarter of an hour.

From intelligent sources it seems there is some foundation for the report that Queen Isabella has made a secret treaty with the Emperor Napoleon, ceding to him the Balearic Islands, providing he will assist her in her designs against Mexico.

This morning the pickets of Gen. Bletker's brigate were attacked at Anandale by a party of bel cavalry, who came across our men very un-conceptedly. Sharp firing took place, and the re-lt was that one rebel was killed and two wound-

ed and taken prisoners. [Sp=cial to the N. Y. Tribune.] General superintendents of the volunteer re-ruiting service will be appointed for all the states, and recruiting in each will be directed upon the system pussued in the regular army. These superintendents will be officers of artillery not serving in the field. Depots for the collec-ion and instituction of recruits under command of on and instruction of recruits under command of e superintendents will be established at the flowing places and such others as shall be con-Michigan at Detroit, in Illinois at Springfield, in Indiana at Indianapolis, in Ohio at Columbus and in Kentucky at Louisvillo. The enlistment papers of the volunteers will be the same as for-regulars. Clothing will be issued to them at the State Department. Commanders of regiments in the field wanting troops will make requisitions diecily upon the superintendents for their respec-ive States. No more cavalry will be accepted y the Government, and it is the purpose of the commanding General to muster out of the service all cavelry recruits in a decomplete regiments, unless they will consent to come in as infantry. The number of cavelry already amounts to between 60,000 and 70,000, much more than the

Government can use.

REBEL News From Pound Gar. — The reported passage of the enemy through Pound Gap. on the Kentucky line, is unfounded. Col. Williams, the commandant of our forces, occupied on Friday last, a position four miles this side, for the reason that there was no camping ground immediately in the Gap. It was the intention of Col. Williams to return after securing his supplies, and defend the Gaps long as he might do it successfully, though the lack of artillery is serious disadvantage in the face of a vasily superior force. In any event, his sharp-shooters will continue to harrass the federals, and the experience of Piketon shows that they can pick then off by the hundred.—Lynchburg Repub.
